Summary Conclusion

In the Muiríosa Foundation 75% of staff members are female. The organisation provides services and support to people with intellectual disability, and it is unsurprising that the significant majority of staff are female, as this was, and remains to be, a career typically followed by females.

The number of males entering into the profession is increasing and this can be seen on the information contained in this report.

The organisation applies the Department of Health and Children Consolidated Pay Scales. Within each pay scale we expect a minimal difference.

The Muiríosa Foundation continues to support family-friendly arrangements in so far as possible while providing services to the individuals we support.
